## Demonstration of Proposed Features

The Smart Agricultural Production Optimization Engine (OptiCrop) successfully demonstrates all the proposed features, including crop recommendation, fertilizer recommendation, soil analysis, weather-based prediction, and production optimization. Each feature was tested and demonstrated successfully, meeting the project objectives and providing accurate recommendations through a simple and user-friendly interface.

| S.No | Feature Name                            | Description                                      | Status      | Demonstrated | Remarks                   |
|------|-----------------------------------------|--------------------------------------------------|-------------|--------------|---------------------------|
| 1.   | Crop Recommendation                     | Predicts suitable crop based on soil and weather | Implemented | Yes          | Successfully working      |
| 2.   | Fertilizer Recommendation               | Suggests appropriate fertilizer                  | Implemented | Yes          | Successfully working      |
| 3.   | Soil Analysis                           | Analyzes soil nutrient values                    | Implemented | Yes          | Accurate analysis         |
| 4.   | Weather-Based Prediction                | Uses weather parameters for prediction           | Implemented | Yes          | Working correctly         |
| 5.   | Production Optimization Implemented Yes | Provides farming optimization suggestions        | Implemented | Yes          | Successfully demonstrated |
| 6.   | User-Friendly                           | Simple                                           | Implemented | Yes          | Responsive                |

|  |           |                       |  |  |        |
