Project name	Smart Agricultural Production Optimization Engine (OptiCrop)
Maximum marks	2 marks

Data Flow Diagram

The Data Flow Diagram (DFD) illustrates how data moves through the Smart Agricultural Production Optimization Engine (OptiCrop). Farmers provide soil and weather details as input to the system. The application processes this information using the machine learning model and agricultural database to generate crop recommendations, fertilizer suggestions, and production optimization advice. The processed results are then displayed to the user, ensuring efficient and accurate decision-making for smart farming.
